Grijze lijnen:

De telefoon is getest, maar wordt niet aanbevolen door Renault. Dit wordt niet veroorzaakt door een kwaliteitsprobleem van de telefoon zelf, maar de koppeling voorwaarden tussen de telefoon en het Renault-systeem, die niet volledig functioneel is en een veilige werking (automatische hold-on functie, toon generatie voor vocale servers, Bluetooth verbinding betrouwbaarheid) mogelijk te maken.

La version de logiciel du téléphone avec lequel le test a été réalisé est indiquée dans la liste de compatibilité. La présence d'une version de logiciel différente dans votre téléphone peut influencer sur les résultats.

(1) Renault a choisi de faire tester ses systèmes par une société indépendante spécialisée dans les tests de compatibilité Bluetooth.

(2) DTMF : Dual Tone Modulation Frequency = fréquence vocale. Possibilité d'émission par le système de téléphonie mains-libres et le téléphone de codes sonores (par appui sur *, #, ...) permettant le pilotage de serveurs vocaux (comme la messagerie opérateur).

Procédure d'appairage : pour en savoir plus, reportez-vous au manuel utilisateur de votre système de téléphonie ou contactez votre concessionnaire ou agent RENAULT agréé.
